

**SEED**   
**TERMINATOR**

## MY20 FOR CASE IH

With 5 times less survivors than its nearest competitor, an OEM designed + warranted driveline and a range of mill techs available to suit your farming system, this future proof platform is hard to beat. It's the future of harvest weed seed control.

# CASE IH SEED TERMINATOR

**99%**  
**KILL RATE**

Confidence weeds  
are terminated

**CASE IH**  
**OEM DRIVE**

Designed for  
Seed Terminator

**PADDOCK**  
**PROVEN**

Two year drive  
warranty

**SEED TERMINATOR** 

# MAGNET TRAY

Magnetic Trap for  
CASE IH

Catch ferrous objects on the sieve before they can drop into your Seed Terminator  
79 rare earth magnets each with 9.2kg pulling force retained in an easy to fit tray

SEED TERMINATOR 

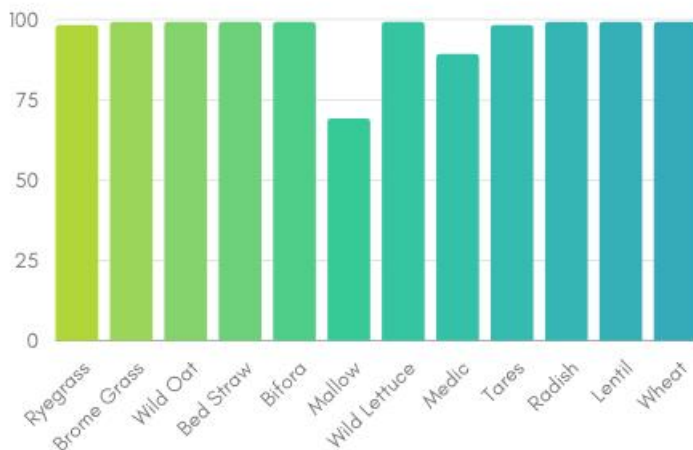

# MAKE THE MOST OF EVERY PASS

Save time and money on wearable parts

Cut lower with confidence

Uptime with paddock proven technology

# Independent Testing

South Australian Grains Industry Trust funded research conducted by Trengove Consulting in 2017 found ryegrass weed seed kill was 93% at 2250 rpm and increased to 98% or greater at normal operating speeds (2500-3000 rpm). Results also showed more than 99% control of several other species including wild radish, brome grass, wild oat, bifora, bedstraw and tares and increasing chaff flow rate (harvest rate) did not reduce control of these species

^ South Australian Grains Industry Trust funded research into Weed seed control at normal operating speeds & settings. Stationary efficacy testing for Model Year 2017

**SEED TERMINATOR** 

ONLY MILLS THAT

**KILL REGARDLESS OF RPM &  
MOISTURE WITH 4 MODES OF  
ACTION: CRUSH ±GRIND ±IMPACT  
± SHEAR = 99% KILL RATE**

**2250-3000RPM**

Don't let weed seeds slip away.  
Attack them with four modes of action

HOW TO KILL A WEED SEED #1

**CRUSH IT!**

## AERO IMPACT

The Seed Terminator AeroIMPACT 3 Multistage Hammer Mill screens are 60% thicker and made from specially sourced Australian Steel with a **kill rate of 99%**. With quick changeover of 10 minutes to replace screens, uptime is always at the forefront of our R&D.

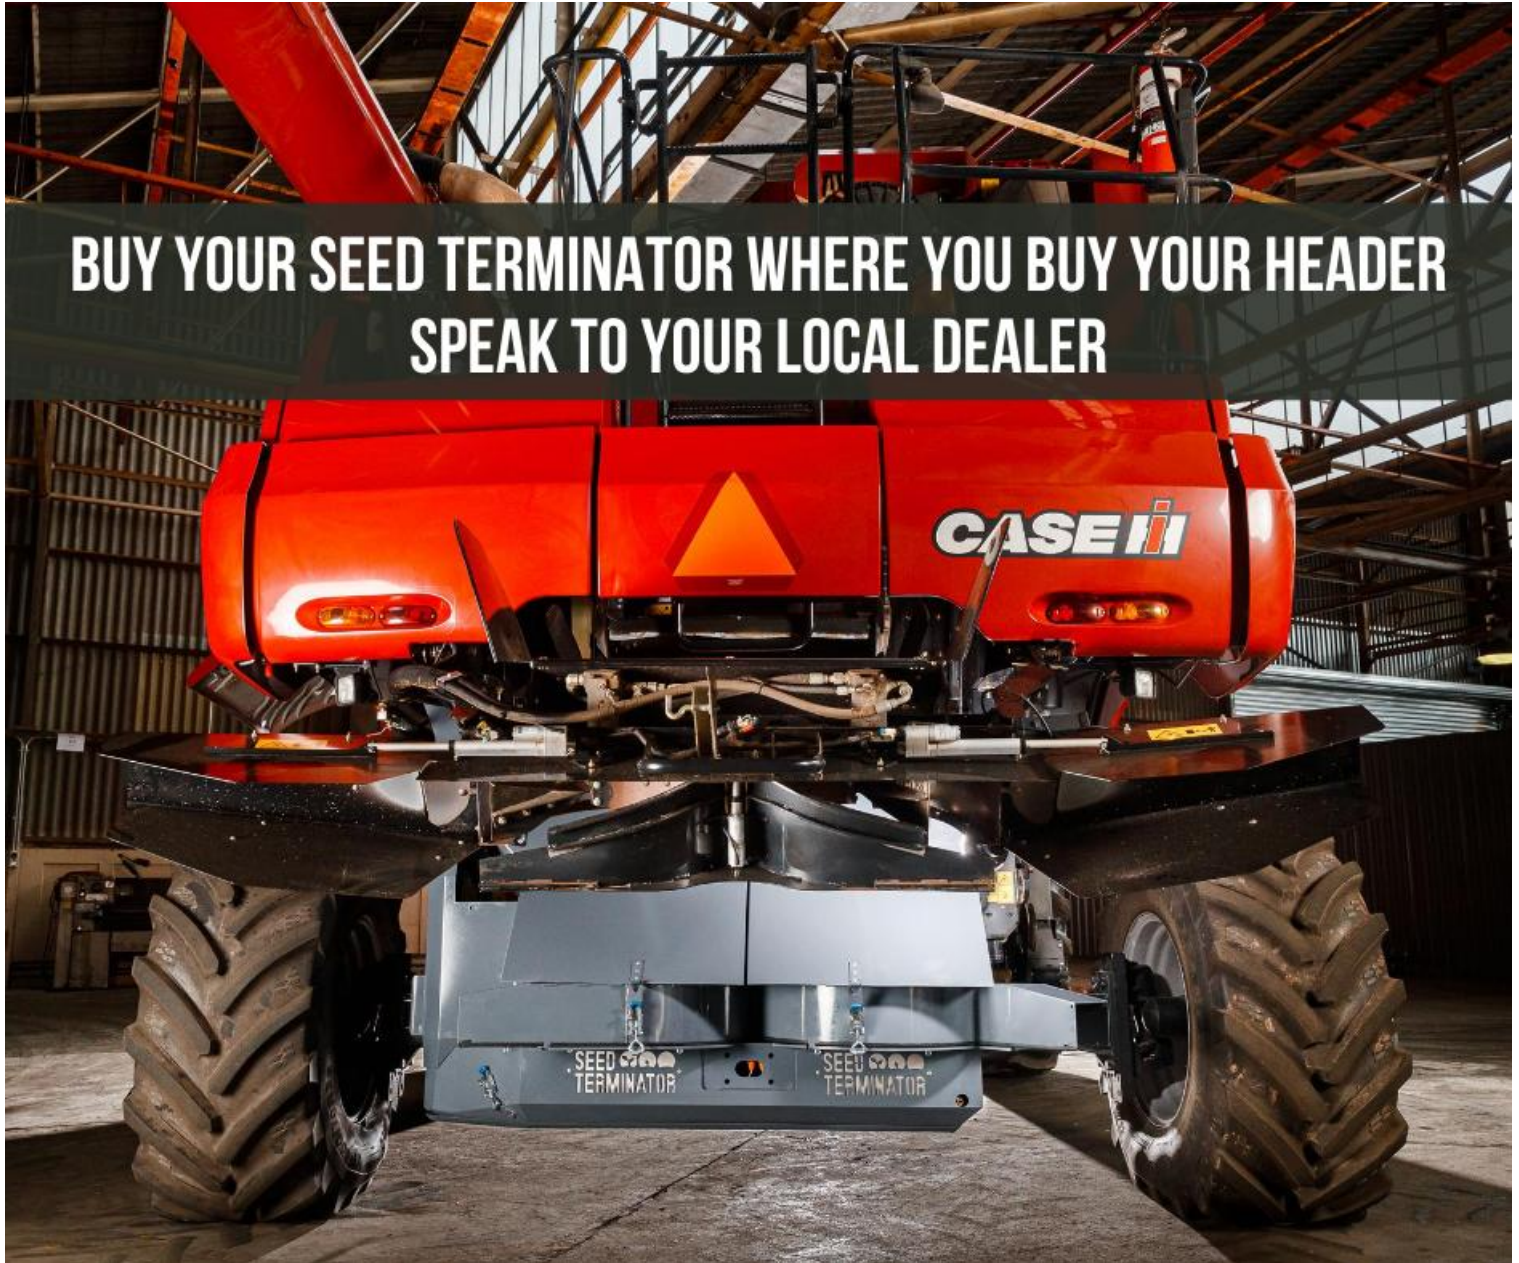

None of our  
AeroIMPACT 3  
mills wore out  
over 2019  
harvest.
